**IN THE SPECIFICATION:**

Please insert the following section headings into the specification:

After the Title and before the paragraph beginning at page 1, line 3 insert:

## BACKGROUND OF THE INVENTION

(1) Field of the Invention

After the paragraph ending on page 1, line 11 and before the paragraph starting on page 1,

line insert:

(2) Description of Related Art

After the paragraph ending at page 1, line 20 and before the paragraph beginning at page

1, line 21 insert:

## BRIEF SUMMARY OF THE INVENTION

After the paragraph ending at page 4, line 15 and before the paragraph beginning at page

4, line 16, insert:

## BREIF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWINGS

After the paragraph ending on page 4, line 24 and before the paragraph beginning on page

4, line 25, insert:

## DETAILED DESCRIPTION OF THE INVENTION

Figure 2 is a schematic view of a typical network in which there are servers 2 operating in the network and interconnected in a manner known per se. Different service providers 33a, which provide services in various forms for the network, are, in turn, connected to the servers 2. At least some service providers provide services in a multiplexed form to ensure the transfer of the services in an appropriate manner via the network to potential service users. Users 4 are also connected to the network, and they are connected to the network via the servers 2. The users have a terminal connected to the user interface, by which terminal the service directories of the services available in the network and, similarly, the services found as a result of a search, can be displayed. The terminal can be a PC, a separate display unit, a monitor accompanying a so-called SET-TOP box, a television or the like by which the data can be displayed. Similarly, several different devices can be connected to the user interface, at least one of them having a display unit which operates as a display device, and the selection of a program and a service order can be delivered to a network by other devices.
